

## LEAD STABILIZERS

### AKROPAN 11084-2 FX

Date 22.03.2017

Rev: 1

AKROPAN 11084-2 FX is a very effective complex lead based stabilizer adding high stability and excellent initial color to the final product.

Being suitable for all critical and non-critical pigmented pipe applications, it contains a well balanced combination of external and internal lubricants to give optimum performance during extrusion.

An increased dosage of stabilizer and/or the addition of lubricants are recommended for formulations containing higher filler amounts.

#### Definition

Complex lead stabilizer-lubricant onepack

#### Chemical and physical properties

Appearance (Physical form)	Flake -	
Appearance (Color)	White -	
Ash (850°C)	27,11 -	29,11

#### Application

Pressure pipe  
Sewer pipe

#### Handling

Wear suitable mask, protective clothing, gloves and eye/face protection.

Avoid release to the environment. Refer to special instructions/safety data sheet.

A material safety data sheet for the safe handling of this product is available on request.

This technical data sheet is not dispensing with the responsibility of the user to follow appropriate legal directives such as regulations regarding food stuff, dangerous substances and safety at working places.

Nothing in this technical data sheet can be constructed as freedom to infringe patents of 3rd parties or to breach regulations and laws.

#### Recommended dosage

Depends on the formulation, processing conditions and the type of product.

#### Mixing

A minimum temperature of 120°C is recommended for optimal dispersion in the dryblend.

#### Standard packaging

25 kg net multilayer paper paper bags or 1 mt big-bag

#### Storage

Store in a cool and dry area, away from rain, snow and direct sun light.

#### Shelf life

12 months
